Dear Bill McIntosh,

DSV Distribution / Operations Up and Running After Virus Attack

DSV is pleased to announce that all our communication and IT systems are back up and running!

This follows an intense period of recovery following a malware attack on 23 January 2017, which bypassed our anti-malware programmes. The attack encrypted a number of our servers and applications, including our switchboards, tracking, dispatching, internet and financial systems. Furthermore, additional services were shut down to contain the malware within our network.

DSV worked closely with relevant providers, industry experts and authorities to resolve the incident, and more than 150 internal and external specialists were involved in the mission to update anti-malware defences, restore servers and cleanse the IT operating environment, including laptops and desktops.

Fortunately, no customer or company data was compromised. While the systems are up and running DSV is committing additional resources to work overtime to ensure the backlogs are eliminated as quickly as possible.

Our tracking is up and running as normal, however due to the manual intervention from the 23rd to the 31st of January you will not have tracking statuses but you will have confirmation of delivery and/or a proof of delivery.

We sincerely apologise for the impact this has caused you and your customers.

We thank you for your patience and understanding in this trying time and we really appreciate your continued support.

Please do not hesitate to contact me should you have further questions.

Yours sincerely

Greg Saffy
